

## Software Development Team Manager

For our client, an internationally leading construction software company with offices in Belgium (Hasselt) and Czech Republic (Prague, Brno) among others, we are looking for a software development team manager. Our client provides calculation and drawing software for engineers, constructors, CAD & BIM specialists and construction companies.

### Why is this job something for you?

- You will work in an international, innovative and multicultural environment where there is a lot of dynamism, enthusiasm and open communication.
- Moreover, you are assured of a motivating salary package supplemented with various additional legal benefits, including a company car, a bonus and the possibility of working from home.

### What are you going to do ?

- You will be leading the Core Product Development Team consisting of high-profile software engineers and architects responsible for the foundation and software infrastructure of our clients product, frameworks for anticipated product developments as well as the growing library of reusable components for internal and external use.
- Critical components include database server, APIs, service integration platform, license protection system, GUI, etc.
- Besides maintaining an outstanding and reliable team performance, you will champion software engineering excellence throughout the development organization as well as a culture of an open and inquisitive mindset, collaborative approach, service oriented through the ease of (re)use & understanding of in-house developed software.
- You will report to the CTO.

### Who are we looking for ?

- You have a university degree in computer science and experience as a software engineer with advanced knowledge of C++ and .NET.
- You also have hands-on experience with different application integration technologies (e.g. API, Cloud computing, PaaS, Enterprise Application Integration, in-memory).
- You are skilled in architectural design and the use of design patterns.
- You have experience in setting up and tooling for continuous integration and delivery and with development in Visual Studio.
- You are Results-driven a team player and a coach.
- You are fluent in spoken and written English.
- You can work from the offices in Prague or Brno.
