

IT Network & Security Coordinator

For our client, a growing mining and chemical multinational, we are looking for an IT Network and Security Coordinator **You will work from the Belgian office in Antwerp.**

Why is this job something for you?

- You will find yourself in a challenging international IT function within a healthy company in full expansion.
- In addition, you can count on thorough in-company training and an interesting salary package supplemented by a company car and other extra-legal benefits.

What are you going to do ?

Being a member of the IT Infrastructure Team your daily tasks are focused to networks and related security services used by the commercial offices and warehouses around the world.

With the assistance of the global IT partners as well as internal IT colleagues, **you will coordinate projects and major changes.** The deployment and lifecycle processes of the Global Managed Networking & Security (GMNS) services are both on-premises and cloud based. These services contribute to the corporate cyber security program.

Based on existing GMNS designs and project methodology you will:

- Execute project preparations
- Schedule project tasks (internal/external)
- Procure equipment and (cloud) services
- Align between project participants (local/remote)
- Resolve issues and report risks
- Report project financials
- Supervise project planning
- Report periodical project status
- Transition to IT operations

Based on partner recommendations (health checks, vulnerability reports, etc.) and/or Continuous Service Improvement initiatives you will coordinate major changes. By implementing automated processes you will contribute to the overall user experience.

You will be based at the Antwerp office (Belgium) and report to the IT Infrastructure & Operations Manager.

Who are we looking for ?

- Bachelor or Master in Applied Computer Sciences or equivalent by experience.
- Minimum of 3 years working experience in networking and security.
- Good knowledge of networking technologies (LAN/WAN/Wi-Fi plus related protocols) and network security (NGFW, IPS, NAC, VPN / ZTNA,...)
- Knowledge of Microsoft Azure Networking services (vWan hub, gateway, VPN, ...) or other public cloud solutions.
- Understanding of SD-WAN, SASE, MPLS, Zero trust,... Notions of security best practices on the abovementioned technologies.
- You take a keen interest in these technologies and are eager to keep a tab on related developments at close quarters. You have good relational and social skills and can easily adapt to different cultures. You excel by virtue of your service-mindedness.
- Your creativity and placid disposition enables you to offer workable solutions regardless of the situation.
- You have excellent English communication skills. Dutch and Spanish are an added value
